

ATTENTION HOMEOWNERS

BEWARE OF SNOW!

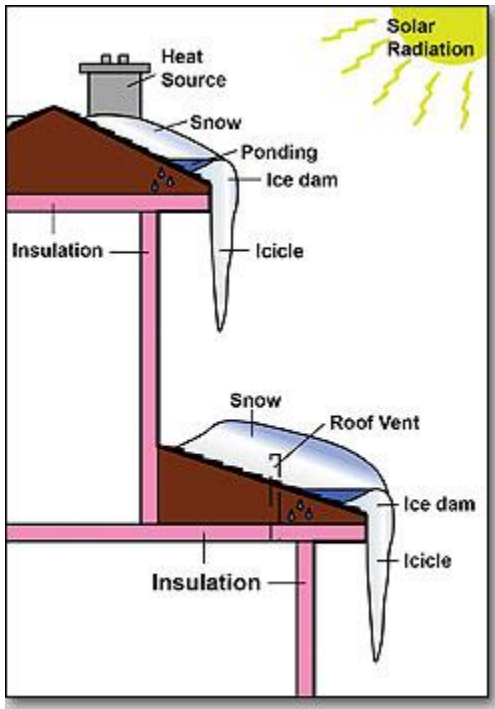

Snow Removal

We also provide *Snow Removal* for homes that experience a significant amount of accumulation on the roof. Snow will begin to pile up on your roof and cause dangerous heavy loading and covering of your roofing, plumbing, bathroom, and kitchen ventilation systems.

All of these can cause potential leaks into your roofing system and can lead to a larger problem: **ICE DAMS**. It is important to keep your roof free of accumulated snow especially when it tends to drift.

By allowing professionals to handle the removal process of snow and ice, it ensures you that your home will stay safe

and free from the problems that can arise if left alone.
